

Using the IPC Scholar 3.0 Reader to View Your Industrial Press eBook(s)

Please note that these instructions are specific to the online Reader application used on the Industrial Press eBookStore site for our digital products. The offline Reader applications we provide (see the separate instructions for downloading those applications and your eBooks for offline reference) are very similar and may function slightly differently. If you have any difficulty with or questions about viewing your eBooks, email us at help@industrialpress.com.

LOG INTO YOUR ACCOUNT

Before you can access your digital products, you first need to log into your Industrial Press (IP) eBookStore account.

- Click on REGISTER/LOGIN at top right.
- Click on “Create Now” at bottom to add an account.
- Enter your Username or Email address and Password to log into your account.

(If you forget your password, you can click on the “Forgot password?” and get an email with a link to reset it.)

YOUR ACCOUNT DASHBOARD AND SUBSCRIBED EBOOKS

Once you are logged in, you will see two new tabs at top:

MY SUBSCRIBED EBOOKS | **MY DASHBOARD**

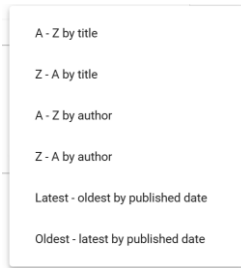

MY DASHBOARD is where you can change your name, password, review your saved favorites, notes, highlights, and bookmarks. You also can view the details of our IP eBookStore orders. You do not need to go into these screens if you are happy with your password and just want to access your eBook(s).

MY SUBSCRIBED EBOOKS is what you click on to see the available eBook product(s) in your IP eBookStore account.

The first ones shown will be the digital products you “Last accessed”; below that will be all of your eBook products.

Click on the icons at right to choose the view of your products (list or grid view)

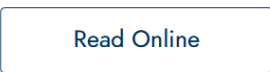

You can sort your eBooks by various criteria:

You also can use the sort options under “My Shelves” at left and add a bookshelf for specific groups of titles by

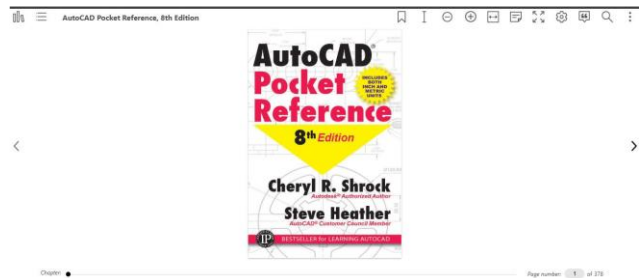

clicking on 

READING YOUR EBOOKS ONLINE

The easy way to read any of your subscribed eBooks is to find your title in your MY SUBSCRIBED EBOOKS and

click on 

Your eBook will open as a default to the cover (first page).

Or, if you have an individual eBook subscription, the Reader may open on the page you were on when you last viewed your eBook.

ICONS AT TOP LEFT

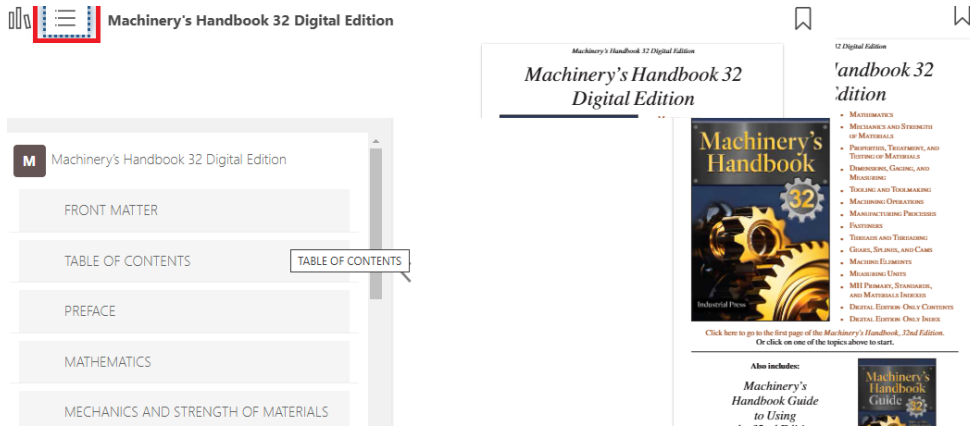

Go To Library: The first icon on the left

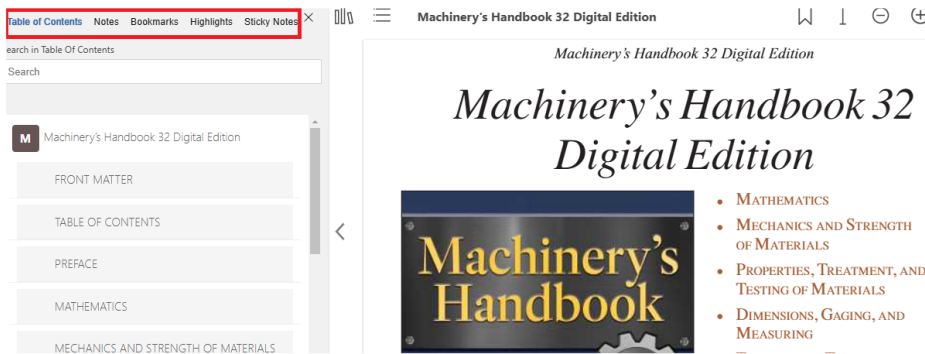

navigates back to the library on the portal.

Table of Contents/Navigation menu: The second icon  opens a special eBook Table of Contents (TOC) created for easy navigation; we call it the navigation or “nav” menu. You can click this icon to view the nav menu, and then use it to go to different parts of the eBook. Some nav menus many have only one level, others may have nested subsections.

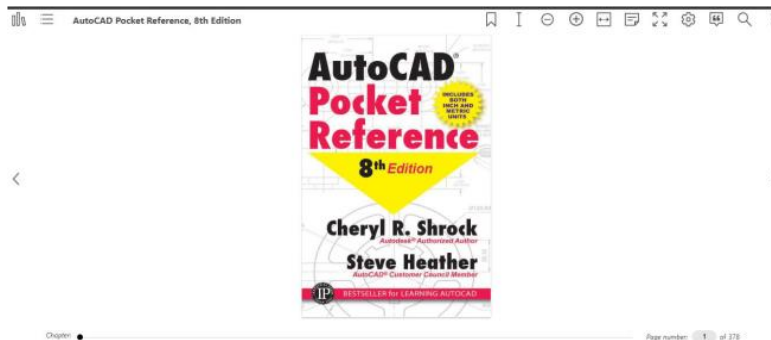

Notation tabs: When you open the TOC or nave menu at the left side of the Reader, you also will see tabs at top for Notes, Bookmarks, Highlights, and Sticky Notes. Each function allows searching within its contents, and search results can be sorted by date or alphabetically.

LANDING / OPENING PAGE OF YOUR EBOOK

The default view of the landing/opening page in the Reader fits your eBook page to the height of your screen, with a single-page horizontal view.

USEFUL ICONS / TOOLS IN THE PROVIDED READER

To move around your eBook:

Go to your bookshelf: Clicking on this symbol at top left will close your eBook and return you to your bookshelf.

Opening the navigation (nav) menu: This symbol will open up the useful left nav for moving around your eBook.

To go to a specific topic, you also can open the Table of Contents in the front matter of the eBook. Or you can use the index at the end of the eBook to click through to any section. Some products (like the extensive *Machinery's Handbook 32 Digital Edition*), have additional sectional tables of contents and internal links.

To move from page to page, use the slider at the bottom of the screen, or enter a specific page number:

Chapter: ● Page number: 1 of 554

To go one page in either direction, just click on the go left/back arrow < or the go right/forward arrow > at the left and right edges of the page.

ICONS AT TOP RIGHT

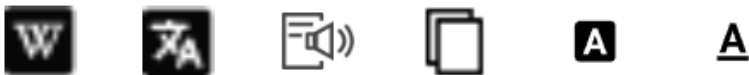

Click on this to **add a bookmark**. Clicking it again removes the bookmark.

Select text: Click on this to change it to this icon  and select text with your cursor.

You will then see this little popup content menu with six icons:

Where you can click on the different icons to perform these actions on your selection (see next page).

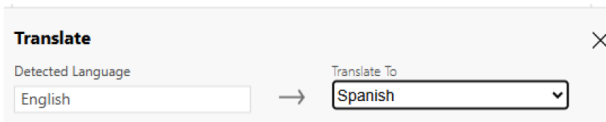

What you can do with your selected text:

Wikipedia Search: Look up the text on Wikipedia.¹

Translation: Translate the text into your choice of a foreign language²

Read Aloud: To hear your selected text, just click on this icon.²

*Copy function not enabled.*³

Highlight text: You can choose the highlight color and add comments.

Underline text: You can choose the underline style.

Notes: (1) While looking up terms in Wikipedia may be useful, please note that IP is not associated with Wikipedia or its content, so consider the source of any information provided by this application accordingly. (2) There is a 2,000-character limit (the size of the buffer) for the Translate and Read Aloud functions. Also, the Translate and Read Aloud functions also are limited to 20 uses per function per eBook session; close the eBook and open it again to refresh your eBook session. (3) Even if you see it on your screen, the grayed-out “Copy” function is not activated; which is why you will get an error message if you click on it.

Zoom In (enlarge text, tables, or figures)

and

Zoom Out (reduce text, table, or figures)

These buttons allow you to zoom in or out as needed for the best view.

Edition

Zoom out

Machinery's Handbook 32 Digital Edition

Full width: This button increases the view to full width.

Edition

Machinery's Handbook 32 Digital Edition

Adjust-page-to-fit button: When you click on the full width button, it will change it to:  which will reset the view to full height height.

These two buttons toggle back and forth. The same basic adjustment options also are available on the “Settings” menu (see below).

Sticky notes: Enable you to add a Comment in a specific location,  which can be useful for adding queries about the text.

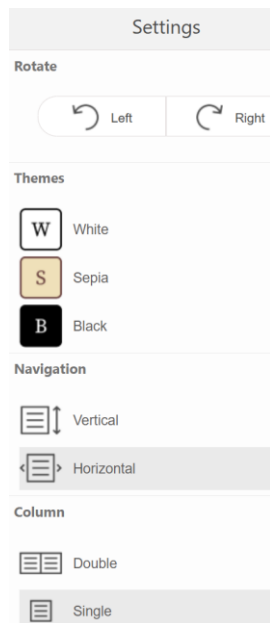

Full screen: This enlarges the eBook to fill the full screen; hitting it again will return to the previous view.

Settings: Hitting the setting button

will open this menu of display options:

Citations: This opens a source citation that may be copied to a clipboard for insertion in an outside document; various style options are available.

Search: Enables you to search the text. (In large eBooks, we recommend being as specific as feasible to avoid too many results.)

Print: Finally, clicking on this icon, if visible at far right, will allow you to print a page for your reference. (Note that even though the options may say to print “All” that just means you can print 1 page or sometimes 2 pages in the two-page view.)

As with all such digital products, Industrial Press eBooks are intended for on-screen viewing, not printing. Therefore, almost all IP eBook subscriptions include a very limited number of printable pages per subscriber per eBook. And multi-user or institutional subscriptions may not allow printing (or offline viewing).

If you need more than a few pages printed, we recommend that you go to our other/main/physical product website, books.industrialpress.com, and purchase the printed book.

(Exceptions include our extensive, online-only Instructor Resource Kits. Also note that the extended Machinery's Handbook 32 Digital Edition includes a lot more than just the printed book; see the product page for more information.)

OUR OFFLINE READER APPLICATIONS

IP eBooks can only be accessed using the IPC Scholar 3.0 Reader. If you downloaded a previous Reader version, you will have to download a new version; we apologize for this inconvenience.

To access IP eBooks, users must be registered through the portal — that is they must have a registered Industrial Press eBookStore account. Please see the icons at the bottom of our home page to download the appropriate offline Reader app; more information on this is included in our SUPPORT/HOW-TO GUIDE section of the site.

Please note that the offline apps are for individual subscribers. The majority of group / multi-user subscriptions are not set up for offline viewing (or printing).

If You Need Our Help: If you have difficulty or questions about any of the above, or if you do not see the features mentioned when viewing your eBook online using the provided Reader application, please send your name, username, email address, call back number, the name of the eBook you are viewing, and a screenshot and details of your question to help@industrialpress.com. Please be aware that it may take us some number of business days to get back to you. We thank you in advance for your patience.
